

JinYuan Teo

Undergraduate at Singapore Management University

Summary

I'm currently a sophomore in Singapore Management University pursuing a Bachelor of Science in Information System. The development of technology and the effects it has had on civilization has always fascinated me, and generated within me a profound interest in computing and business management. My passion for technology has expanded after I decided to further my education in this field. I'm highly motivated and task oriented individual with the ability to perform and deliver results. A strong team player with the ability to motivate others, and to get the job done efficiently and effectively. I've held key appointment as president and organizing committee member for school-wide events and school clubs, with much experience in leading and managing teams comprising of members of diverse backgrounds, skills and traits.
